PROFILE

Results-driven Computer Science student specializing in AI & ML, skilled in crafting efficient solutions and ensuring top-tier code quality. Strong in communication, teamwork, and adaptability, with a proven track record of delivering impactful results in cross-functional teams. Seeking to apply technical expertise and innovation in a dynamic professional setting.

EDUCATION

Course	College / University	Year	CGPA / Marks
B.Tech (CSE AI & ML)	SRM Institute of Science and Technology	2022-Present	9.22/10
Board (Class XII)	Narayana Junior College	2022	932/1000
Board (Class X)	Panchajanya Briliants High School	2020	559/600

SKILLS

- **Languages:** Python, C++, C
- **Technical Skills:** SQL, NumPy, Pandas, Data Science, ML NLP
- **Developer Tools:** Alteryx Designer , PowerBI, Git/Github
- **Coursework:** Operating Systems, Computer Networks, Data Structures and Algorithms
- **Soft Skills:** Problem Solving, Critical Thinking, Time Management, Communication

WORK EXPERIENCE

- **Accenture | DataAnalyst · Virtual Intern** **01/2025 – 03/2025**
 - Performed data cleaning, transformation, and visualization using SQL and Power BI to uncover key business trends. Delivered interactive dashboards that supported data-driven decision-making through clear, actionable insights.
- **ANZ | Cyber Security Management · Virtual Intern** **03/2025 – 04/2025**
 - Completed practical projects in social engineering and digital investigations. Gained hands-on experience in identifying cyber threats, analyzing attack patterns, and enhancing financial data security through digital forensics and risk mitigation strategies.

PROJECTS

- **Crop Monitoring using satellite imagery**
 - Developed a scalable crop monitoring system using Python, machine learning, and satellite imagery to deliver real-time, predictive insights for precision agriculture. Enhanced yield prediction, supported sustainable farming, and optimized performance for large datasets
- **Chitti Bot**
 - Developed an AI-powered conversational chatbot using Python and Flask, enabling backend request handling and NLP-based intent matching.
 - Integrated pre-trained NLP models (Hugging Face) to improve semantic understanding and conversational response accuracy.

- **BillGuru – FMCG Wholesale Billing & Inventory Management**
 - Implemented FMCG-standard invoice calculations including PTR, GST, trade discounts, and scheme adjustments to ensure accurate financial totals.
 - Built backend services using FastAPI with SQLite database for product management, invoice storage, and stock updates.
 - Developed a user-friendly web interface using HTML, CSS, and JavaScript for quick product entry, billing, and inventory monitoring.

CERTIFICATES

- Database Structures and Management with MySQL
- Data Analysis and Visualization with PowerBI
- AWS Machine Learning Foundations

LANGUAGES

- English (Professional)
- Telugu (Native)
- Hindi (Working Proficiency)
- Tamil (Fundamental Proficiency)
